

Amendments to the Claims

Claim 1 (currently amended): A DVD movie disk comprising:

a disk having a quantity of stored information on a portion thereof, wherein said stored information can be read by a DVD player device;

wherein a first portion of said stored information provides a first soundtrack of a movie in a first language whereby said first soundtrack comprises a plurality of words in said first language;

wherein a second portion of said stored information provides a second soundtrack of said movie that is also in said first language whereby said second soundtrack comprises a plurality of words in said first language, wherein a minor portion of said words of said first soundtrack is not included in said second soundtrack, and wherein said words that are not included in said second soundtrack are of a type that would normally not be found in a 'G'-rated movie;

wherein a third portion of said stored information provides an entire [[a]] visual portion of said movie; and

wherein when said DVD movie disk [[in]] is played using a DVD player device, a user can select to view said entire visual portion of said movie in combination ~~the movie~~ with either of said first or second soundtracks.

Claim 2 (original): The DVD movie disk of Claim 1 wherein the second soundtrack is a digitally re-mastered version of the first soundtrack.

Claim 3 (original): The DVD movie disk of Claim 1 wherein the first soundtrack includes a particular word whereby when said first soundtrack is played with the visual portion of the movie, the inclusion of said particular word necessitates the movie receiving a predetermined rating that corresponds to a particular minimum maturity level, and wherein said second soundtrack does not include said particular word whereby when said second soundtrack is played with the visual portion of said movie, said movie would receive a rating that corresponds to a particular minimum maturity level that is different from that of the first soundtrack.

Claim 4 (original): The DVD movie disk of Claim 1 wherein a fourth portion of said stored information provides a third soundtrack of said movie, wherein said third soundtrack is in a second language whereby a plurality of words of said third soundtrack are in said second language and wherein a major portion of the words of said first soundtrack are not included in said third soundtrack.

Claim 5 (currently amended ): A DVD movie disk comprising:

a disk having a movie stored thereon, wherein the movie is in the form of a quantity of stored information, and wherein said stored information can be read by a DVD player device;

wherein a first portion of said stored information provides a first soundtrack of a movie, wherein said first soundtrack is in a first language whereby said soundtrack includes a plurality of words, and wherein a major portion of said plurality of words is in said first language;

wherein a second portion of said stored information provides a second soundtrack of said movie, wherein said second soundtrack is in a second language whereby said second soundtrack includes a plurality of words, wherein a major portion of the words of said second soundtrack is in said second language, and wherein said second language is different from said first language;

wherein a third portion of said stored information provides a third soundtrack of said movie, wherein said third soundtrack is in said first language whereby said third soundtrack includes a plurality of words, wherein a major portion of said plurality of words is in said first language, wherein a minor portion of the words of said first soundtrack are not included in said third soundtrack, and wherein said minor portion of the first soundtrack's words that are not included in said third soundtrack comprises at least one word that is of a type that at least some people would consider objectionable;

wherein a fourth portion of said stored information provides

a visual portion of an entire version of said movie; [[and]]

wherein when said DVD movie disk [[in]] is played using a DVD player device, a user can select to watch a first version of the movie in which said visual portion of said entire version of said movie is combined with ~~any one of~~ said first ~~, second or third soundtracks~~ soundtrack; and

wherein when said DVD movie disk is played using a DVD player device, a user can select to watch a second version of the movie in which said visual portion of said entire version of said movie is combined with said third soundtrack.

Claim 6 (original): The movie disk of Claim 5 wherein said first soundtrack and said third soundtrack are identical except for said words that are not included in said third soundtrack.

Claim 7 (original): The movie disk of Claim 5 wherein when said third soundtrack is created, a substitute word is used in place of at least one of said words from said first soundtrack that is not included in said third soundtrack.

Claim 8 (original): The DVD movie disk of Claim 5 wherein the third soundtrack is a digitally re-mastered version of the first soundtrack.

Claim 9 (original): The DVD movie disk of Claim 5 wherein the

first soundtrack includes a particular word, wherein when the movie is viewed using said first soundtrack, the inclusion of said particular word causes the movie to receive a predetermined rating that corresponds to a particular minimum maturity level, and wherein said third soundtrack does not include said particular word, wherein when said movie is viewed using said third soundtrack, the movie would receive a rating that corresponds to a particular minimum maturity level that is different from that given the movie using the first soundtrack.

Claim 10 (original): A method for presenting a movie wherein at least one predetermined word has been removed from a soundtrack of said movie, said method comprising:

having a computer read a quantity of data relating to said movie, wherein said data is located on a data storage device, wherein said data includes information relating to a visual portion of said movie and a soundtrack for said movie, wherein said soundtrack includes a plurality of words;

having said computer analyze at least a portion of said data associated with said soundtrack, whereby when said computer analyzes said data, it recognizes the individual words in said soundtrack;

wherein said computer then attempts to match each word of said soundtrack against a predetermined list of words; and

wherein if said computer finds a word in said soundtrack

that is also included in said predetermined list of words, the computer will then modify said soundtrack to omit said word as said computer presents said movie via a display device and at least one speaker, whereby a user can then watch said movie and listen to the words in said soundtrack and not hear any words that are included in said predetermined list of words.

Claim 11 (original): The method of Claim 10 wherein when said computer finds a particular word in said soundtrack that is also included in said predetermined list of words, the computer will delete said particular word from said soundtrack and play no word in the place of the deleted word when presenting said soundtrack via a display device and at least one speaker.

Claim 12 (original): The method of Claim 10 wherein when said computer finds a particular word in said soundtrack that is also included in said predetermined list of words, the computer will play an altered word in lieu of said particular word when it presents said movie via a display device and at least one speaker.

Claim 13 (new): A stored movie comprising:

a quantity of information recorded on a storage device, and wherein said information is in a form that can be read by a reader device capable of outputting a signal that enables the

display of said movie via a display apparatus;

wherein a first portion of said information provides a first soundtrack of said movie, and wherein said first soundtrack is in a first language and comprises a plurality of words in said first language;

wherein a second portion of said information provides a second soundtrack of said movie, wherein said second soundtrack is also in said first language and comprises a plurality of words in said first language, and wherein at least one word of said first soundtrack is not included in said second soundtrack;

wherein a third portion of said information provides a video portion of an entire version of said movie;

wherein said first, second and third portions of information are separate from each other;

wherein when a user wishes the movie displayed in a first form, the recorded information is in a form that enables said reader device to send a signal to the display apparatus that includes said video portion of said entire version of said movie in combination with said first soundtrack; and

wherein when a user wishes the movie displayed in a second form, the recorded information is in a form that enables said reader device to send a signal to the display apparatus that includes said video portion of said entire version of said movie in combination with said second soundtrack.
